## **DETAILED ACTION**

### ***Response to Amendment***

1. The amendment filed on 05/18/2009 has been entered.

### ***Response to Arguments***

2. Applicant's 05/18/2009 arguments in view of the 05/18/2009 claim amendments have been fully considered and they are persuasive to overcome the 35 USC101 and 103 rejections set forth in the office action mailed on 02/24/2009. Applicants amendments to claim 2 do introduce new 35 USC 112 issues set forth below.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 2 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly claimed "parallel movement unit" and "output unit" do not have a clear description in the specification. Step 5060 and step 8020 and paragraph [0075] as well as the remaining specification does not convey the claimed

Art Unit: 2628

parallel movement unit. Step 5070 and step 8020 and paragraph [0075] as well as the remaining specification does not convey the claimed output unit.

### ***Allowable Subject Matter***

5. Claims 1 and 3 are allowed. The prior art of record fails to teach or suggest in the context of claim 1:

*a constraining shape generation unit constructed to generate a triangular patch from three points sequentially input by the constraining shape input unit and to generate a constraining shape based on at least one said constraining plane; and*

*a display unit constructed to translucently display the triangular patch generated by said constraining shape generation unit.*

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2628

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
